Software Engineering student at COMSATS University Lahore with hands-on experience in Java, SQL, and the MERN stack. Strong foundation in Data Structures and Algorithms, with a passion for building scalable and efficient web and mobile applications. Proven ability to develop full-stack solutions and deliver high-quality projects from concept to deployment.

PROJECTS & TECHNICAL EXPERIENCE

Employee Management System

Developed an Employee Management System using Java with OOP principles (inheritance, polymorphism, encapsulation), implementing full CRUD operations with file handling for data persistence, validation, and a user-friendly console interface.

Advanced Chat Application

Designed a chat application using hash maps, queues, and binary trees reducing message retrieval time by 50% in multi-user environments; applied Observer and Singleton design patterns for scalable architecture with 99% uptime during load testing.

Supermarket Management System

Designed a normalized relational database with proper indexing improving query performance by 40%, with stored procedures for automated inventory updates; built a C# Windows Forms desktop app for billing automation and sales analytics.

Ride Booking Application

Created a comprehensive prototype with wireframes and high-fidelity mockups for passenger and driver interfaces across 30+ screens; conducted usability testing reducing booking flow steps by 25% with a reusable design system.

Real-Time Chat Application

Built a cross-platform mobile chat app with Flutter and Firebase featuring real-time messaging, Firebase Authentication, Firestore sync, and Material Design UI; deployed to iOS and Android reaching 100+ beta users.

Mian Autos

Full-Stack Vehicle Marketplace Platform | MERN Stack • mianautos.site

Developed a full-stack vehicle marketplace using MongoDB, Express.js, React, and Node.js with dynamic filtering, RESTful APIs reducing data retrieval time by 30%, responsive UI components, and optimized MongoDB schemas.

EDUCATION

COMSATS University Islamabad, Lahore Campus

Bachelor of Science in Software Engineering

Expected 2027

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Systems, Software Engineering, Web Technologies

SKILLS & TECHNOLOGIES

Programming Languages: Java, Python, C++, SQL, JavaScript

Frameworks & Libraries: Flutter, React, Express.js, Node.js, Next.js

Databases: MongoDB, SQL Server, Firebase Firestore, Supabase

Tools & Platforms: Git, GitHub, Figma, VS Code, Android Studio

Core Competencies: Object-Oriented Programming (OOP), Data Structures & Algorithms, Database Systems, Web Tec, SEC, HCI

CERTIFICATIONS

Flutter Development Certification

September 2025 – November 2025

Elevare Tech - Comprehensive training in cross-platform mobile development with Flutter framework
